

Otter Creek Engineering, Inc.

Professional, Innovative, Practical

Commitment, Communication, Satisfaction

At Otter Creek Engineering, our staff is committed to every project on which they work. This commitment extends from the initial meeting through the end of construction and start-up. Each project is managed by a principal of the firm, who has a direct vested interest in the successful completion of the project. That same individual is the client's primary contact throughout the life of the project: providing our clients with consistent and responsive service.

Otter Creek Engineering recognizes that communication is critical to a project's success. Using our strengths in project management and communication we work with the client, the local, state and federal regulators, and the community to design successful projects.

Otter Creek Engineering, Inc. was established in March, 1998 by Gary Fern, Peter DeGraff, Carl Crawford, and Jason Larocque. Our goal remains to operate an engineering firm in which all employees work cooperatively to complete projects successfully and satisfy clients.

In 2000, we purchased an 1840's general store and moved our office to East Middlebury. This move allowed us to create a more desirable working atmosphere and to purchase state-of-the-art equipment to more effectively manage and complete projects.

In 2002, we opened a second office in Rutland, Vermont.

All projects have different requirements. All clients have different needs. Otter Creek Engineering provides a range of services tailored to meet each project's and client's needs. Our office size and commitment to client satisfaction allows us to be responsive and flexible with project scheduling.

The establishment of long-term relationships with our clients is the goal of Otter Creek Engineering. The broad marketplace has taught us that client satisfaction and personal service are critical to success. Satisfied clients are the best form of advertising. Client satisfaction is, therefore, the primary emphasis in all that we do at Otter Creek.
